WEEK FOCUS

Objective	Build and run a real, working automation that connects real apps and an LLM and does a job end-to-end — no theory. The deliverable is a live automation you can trigger and demo.
Skills Targeted	Workflow automation Triggers & actions App integrations LLM node Error handling
Tools & Stack	n8n (self-host or cloud) or Make Gmail / Sheets / Slack / Notion Anthropic or OpenAI node webhooks

TASK LIST

01 Set up your automation platform

- Create an n8n (or Make) account / instance.
- Connect at least two real apps you use (e.g. Gmail, Google Sheets, Slack, Notion) via official connectors.

02 Automation #1 — inbox / message triage

- Trigger on a new email / form / message → LLM classifies + summarises → route (label, Slack ping, or Sheet row).
- It must run automatically, not on a manual button.

03 Add a structured LLM step

- Use your Week-02 JSON prompting inside the workflow so the LLM output reliably drives branching (priority = high → notify).

04 Handle failures

- Add error branches, retries and a fallback so the workflow never breaks silently.
- Log every run.

05 Automation #2 — content / data pipeline

- New row / RSS / upload → LLM transforms (summary, tags, draft) → writes to Notion / Sheet / Doc.

06 Document & demo

- Write a one-page runbook (what it does, triggers, cost, how to fix it).
- Record it running on real data.

DELIVERABLES

#	DELIVERABLE	FORMAT
1	Exported workflow JSON (x2)	JSON
2	Screenshots of live automated runs	PNG
3	Proof of structured-LLM branching	PNG / PDF
4	Proof of a failed-then-recovered run	PNG
5	One-page runbook	PDF
6	Demo video on real data	MP4

SUBMISSION PROTOCOL

Channel	Upload to the VaultX LMS under Internship > AI Track > Week 03.
File Naming	VX_AI_W03_FirstName_LastName.pdf plus one ZIP with all supporting files, exports and screenshots.
Deadline	Sunday, 11:59 PM (PKT) of the assigned week.
Evidence	Every screenshot must show your machine clock and the relevant page/scope.
Walkthrough	Record a short screen video (3–5 min) explaining what you did, what you found, and how you stayed safe.
